5100 Logistics Section Organization

Refer to Section 5001 of the [REGIONAL CONTINGENCY PLAN](#).

5110 Logistics Section Planning Cycle Guide

Refer to Section 5001.01 of the [REGIONAL CONTINGENCY PLAN](#).

5200 Support

The Support Branch Director, when activated, is under the direction of the Logistics Section Chief, and is responsible for development and implementation of logistics plans in support of the Incident Action Plan, including providing personnel, equipment, facilities, and supplies to support incident operations. The Support Branch Director supervises the operation of the Supply, Facilities, Ground Support and Vessel Support Units.

- a. Review Common Responsibilities in the [INCIDENT MANAGEMENT HANDBOOK](#).
- b. Obtain work materials from Logistics Kit.
- c. Identify Support Branch personnel dispatched to the incident.
- d. Determine initial support operations in coordination with Logistics Section Chief and Service Branch Director.
- e. Prepare initial organization and assignments for support operations.
- f. Determine resource needs.
- g. Maintain surveillance of assigned unit work progress and inform Logistics Section Chief of activities.
- h. Resolve problems associated with requests from Operations Section.
- i. Maintain Unit/Activity Log (ICS 214).

5210 Supply

The Supply Unit Leader is primarily responsible for ordering personnel, equipment and supplies; receiving, and storing all supplies for the incident; maintaining an inventory of supplies; and servicing non-expendable supplies and equipment.

- a. Review Common Responsibilities in the [INCIDENT MANAGEMENT HANDBOOK](#).
- b. Review Unit Leader Responsibilities in the [INCIDENT MANAGEMENT HANDBOOK](#).
- c. Obtain a briefing from the Support Branch Director or Logistics Section Chief.
- d. Participate in Logistics Section/Support Branch planning activities.
- e. Provide Kits to Planning, Logistics and Finance Sections.
- f. Determine the type and amount of supplies enroute.
- g. Arrange for receiving ordered supplies.
- h. Review Incident Action Plan for information on operations of the Supply Unit.
- i. Develop and implement safety and security requirements.
- j. Order, receive, distribute, and store supplies and equipment and coordinate contracts and resource orders with the Finance Section.
- k. Receive and respond to requests for personnel, supplies, and equipment.
- l. Maintain inventory of supplies and equipment.

- m. Coordinate service of reusable equipment.
- n. Submit reports to the Support Branch Director.
- o. Maintain Unit/Activity Log (ICS 214).

5210.1 Oil Response Equipment

Refer to <http://www.uscg.mil/hq/g-m/nmc/response> for a list of OSROs in the LA/LB COTP zone.

SECURITY: 24 hr. security

LOGISTICS: Tables, chairs, lodging, and catering available. There is also a restaurant on site.

PARKING: Adequate parking is available

COST: \$60.00 per day

5220.11.21 WIND AND SEA RESTAURANT

ADDRESS: 34699 Golden Lantern

Dana Point, CA 92629

PHONE: (949) 496-6500; Fax (949) 496-2605

POC: Manager on duty.

AVAILABILITY: Immediate use subject to availability at time of request

PHYSICAL DESC: 2,376 sq. ft.

COMMS. CAPABILITY: Several phone jacks.

SECURITY: Access can be easily controlled because it is upstairs and isolated.

LOGISTICS: Tables, chairs, and catering available. There are several hotels in the area.

PARKING: First come, first serve basis in a very congested parking lot.

COST: \$65.00 per day.

5220.2 Incident Command Post Needs

Incident command post needs vary from incident to incident. The above incident command posts have immediate access to necessary resources depending upon the incident requirements. Please see above section 5220.1 for pre-designated incident command posts.

5220.3 Berthing

5220.31.1 Northern Sector

San Luis Obispo Visitors Bureau	(805) 541-8000
Santa Barbara Visitors Bureau	(805) 966-9222
Ventura Visitors Bureau	(805) 648-2075

5220.31.2 Southern Sector

Los Angeles County

Long Beach Visitors Bureau	(562) 436-3645

5320.2 Ambulance/EMS Services

Call 911 for immediate assistance

5400 Communications

5410 Communications Plan

5410.1 Incident Communications

The primary purpose of this annex is to establish which radio frequencies will be used for interagency communication in an oil spill response. Most of the frequencies are within the marine band of the VHF-FM spectrum. Section 5410.4 is a graphic representation of this frequency allocation. A secondary purpose is to identify the operating frequencies used by principal federal and state agencies, and provide an overview of those agencies' capabilities and resources.

5410.11.1 Unified Command Calling and Coordination Frequency

Channel 83A (157.175Mhz) has been chosen as the frequency for communication between the Coast Guard and OSPR. This frequency will also be used for communications with USCG and OSPR aircraft involved in the response operation.

5410.11.2 Unified Command/Responsible Party Calling and Coordination Frequency

150.980Mhz has been designated as the frequency for communication between the Coast Guard or OSPR and the Responsible Party and the major co-ops in this Area of Responsibility.

5410.11.3 U.S. Coast Guard working frequencies:

Channel 81A (157.075Mhz) has been designated as the frequency for communication between U.S. Coast Guard units and other Coast Guard personnel who are part of the FOSC staff.

Channel 21A - primary working/SAR frequency used by Station Channel Islands Harbor

Channel 23A - primary working/SAR frequency used by Station Los Angeles.

Channel 16 - (156.8Mhz) Designated under international convention for use for ship-to-ship hailing and distress in international waters. ALL users are required to use channel 16 for only these purposes and then switch to other channels for subsequent communications. Oil spill response is no exception.

Channel 13 - (156.65Mhz) Designated as bridge-to-bridge hailing and navigation safety frequency in inland and offshore waters. It may be used only to establish contact and make arrangements between vessels in crossing, meeting, or overtaking situations in accordance with the International or Inland Navigation Rules.

5410.11.4 Safety Frequency

Channel 06 (156.3Mhz) is designated as the frequency, which may be used by all parties for communication on matters involving human health and safety. FCC regulations require all vessels equipped with VHF-FM capability to have this channel.

5410.11.5 CA Office of Oil Spill Prevention and Response (OSPR) working frequency

In central and northern California, OSPR wardens' and biologists' working frequencies are 159.435Mhz (TX) and 151.415Mhz (Rx). However, OSPR wardens do have radios with VHF channel 83A, and this may be the best way to establish and maintain contact between them and CG first responders in the initial stages of a spill response.

5410.11.6 County OES and local government agency operating frequencies

County OES's and local government agencies such as police, fire, county sheriffs, and environmental health departments have frequencies and communications systems established within their counties. It is not the intent of this plan to interfere with or change those established systems. CALCORD (156.075Mhz) is the frequency to be used for coordination among those agencies and between those agencies and OSPR.

5410.11.7 Intra-agency and Intra-company communications

It is expected that each government agency and private company involved in the response operation will continue to use its own normal working frequency(s) for internal communication.

5410.11.8 Alternate oil spill containment and cleanup frequencies

47 CFR Part 90.65 designates the frequencies listed below as available for use in oil spill containment and cleanup operations.

- (1) 36.25Mhz VHF-FM
- (2) 41.71Mhz VHF-FM
- (3) 154.585Mhz VHF-FM
- (4) 158.445Mhz VHF-FM
- (5) 159.480Mhz VHF-FM
- (6) 454.000Mhz UHF*
- (7) 459.000Mhz UHF*

*these are the primary operating frequencies used by the co-ops Clean Bay and Marine Spill Response Corporation

5410.2 Communications Support

Refer to Section 5410.3 or 5410.4 of this Plan

5410.3 Coast Guard Communication Capabilities

The Coast Guard **Marine Safety Office** in Alameda is equipped only with a Marine Band radio in its watch office. Transmitting from its high site on Mt. Tamalpais in Marin County, it has a reliable range of approximately 20 miles, which covers the Gulf of the Farallones.

However, the Coast Guard has a system of high sites along the coast designed to provide VHF-FM and HF coverage of the entire coast. Coast Guard Groups Monterey, San Francisco, and Humboldt Bay all have VHF phone patch capability; therefore the SECTOR Command Duty Officer (CDO) should be able to communicate with any vessel within range of one of the repeaters. The locations of these repeaters are listed in Figure 3320.9a. By phone patch through Communications Area Master Station Pacific (CAMSPAC), located at Pt. Reyes, the SECTOR watch office could communicate on HF frequencies to a vessel offshore anywhere off the coast of California.

The Coast Guard **Pacific Strike Team** possesses a cache of programmable hand-held VHF-FM radios and a computer, which can tune those radios to any desired frequency. The Strike Team also owns several portable repeaters, which can be tuned to a desired frequency and deployed wherever necessary. It also has one portable INMARSAT telephone system.

SECTOR Mobile Command Post

The SECTOR Mobile Command Post is a communications equipped two-person, 20ft trailer. It is capable of providing temporary land-based communications support for pollution investigators at the spill site. Although not a fully independent Command and Control platform the Command Post can act as a relay point via facsimile, and cellular phone to a more reliable Communications-equipped unit. The SECTOR Command Post currently has the following equipment:

- (1) Mitsubishi (Model f10) facsimile. Used in conjunction with the Nokia cellular phone.

(2) Nokia LX11T Cellular Mobile telephone and power supply.

(3) One Motorola MCX1000 VHF-FM Radio (25 Watts).

(4) MX300 Remote VHF-FM Radio (Dashboard Console)

(25 Watts)

Pacific Strike Team Command Trailer

Pacific Strike Team also has a Communications/Mobile Command Post trailer equipped with VHF-FM radio and multiple line telephones.

Coast Guard VHF-FM High Sites

HIGH SITE	LOCATION	CONTROL	ELEVATION
(A) Point St. George	41-45N 124-15W	Gru Humboldt Bay	200Ft
(B) Trinidad Head	39-41N 124-10W	Gru Humboldt Bay	300Ft
(C) Cahto Peak Bay	39-41N 123-35W	Gru Humboldt Bay	4200Ft
(D) Pt. Cabrillo	39-25N 123-45W	Sta Noyo River	50Ft
(E) Mt. Jenner	38-29N 123-11W	Sta Bodega Bay	1330Ft
(F) Mt. Umunhum	37-09N 121-54W	Gru San Francisco	3380Ft
(G) Pt. Sur Light	36-18N 121-54W	Gru San Francisco	200Ft
(H) Cambria	35-32N 121-15W	Gru LALB	500Ft
(I) Tranquillion Mt.	34-35N 120-33W	Gru LALB	2170Ft
(J) Laguna Peak	34-07N 119-04W	Gru LALB	1457Ft
(K) San Pedro Hill	33-45N 118-20W	Gru LALB	1480Ft

Coast Guard HF High Sites

(J) Arcata	52-00N 124-05W	Gru Humboldt Bay	N/A
(K) Pt. Arena	38-57N 124-44W	Gru Humboldt Bay	N/A
(L) Pt. Bonita	37-48N 122-32W	Gru San Francisco	N/A
(M) Pt. Pinos	36-38N 121-56W	Gru San Francisco	N/A
(N) Cambria	35-32N 121-15W	Gru LALB	500Ft

Transportable Communication Centers (TCC'S)

The TCC is a self-contained, rapidly deployable Coast Guard manned and maintained Communications Module. It can provide a full range of telecommunications capabilities to support a large oil spill response. These include:

- point to point, air/ground, ship/shore, and shore side radio communications (secure or non-secure) in the HF, VHF and UHF bands.
- different types of antennas for best propagation and coverage in remote and uneven terrain

- cellular telephone (secure, non-secure, and computer/data link)
- INMARSAT (satellite telephone system)
- Landline phone bank of over 100 lines

One TCC is located at the Coast Guard Communications Area Master Station Pacific (CAMSPAC) at Pt. Reyes, CA in a six hour (B-6) recall status. It can be towed by truck or airlifted by helicopter. Aviation Electronic Technicians and Radiomen accompany the units. The TCC can be powered by generators (which accompany the unit) or directly connected to a power source. The full antenna setup requires an area of approximately 200 feet by 200 feet. These are important considerations in the decision where to locate the unit and perhaps the forward command post.

OSPR Communications Capabilities:

OSPR also has a system of repeaters and high sites throughout the state. At present coastal coverage is approximately 75%. However, two portable repeaters are also available to provide coverage in remote areas and provide for a local net at a spill site. OSPR vehicles and personnel throughout the state have VHF-FM radios (150-174Mhz), and OSPR has a cache of 34 handheld "pool" radios for use by other agencies or groups assisting in spill response. The OSPR Communications Manager is Mr. Brian Groves (916-324-7994).

Mobile Communications Staging Areas

The selected shore side staging area for multi-agency operations will be directed via landline, or on CH83A VHF-FM Coordination NET. Once a communications site has been selected, mobile communications vehicles and trailers should be located no closer than 25ft to each other. The need for alternate or multiple staging areas and attendant communications coverage will depend on the extent of the coastal area affected by the spill.

Communications Status Charts

In order for all response agencies to effectively organize communications efforts, information on communications status must be shared by all agencies at the staging area. Once mobile communications trailers are in place, and agencies have checked into CH83A, a communications status chart listing each agencies' guard requirements should be prepared and updated as situations dictate. All agencies should fill in the appropriate information on a chart similar to the Communications Status Chart (Figure 5000.C) on the next page. The communications status chart should also be reproduced in paper form and distributed to all other response agencies located at the staging area. Additional updates or changes in unit status may be relayed via CH83A once communication status charts have been distributed.

Security Awareness

Radio communications, unless encrypted for secure transmission, are subject to electronic surveillance and monitoring by private citizens and the public media. All agencies should be security conscious before transmitting information by radio that may be considered media sensitive, proprietary, or private. Good judgment is the only rule that applies; however, public affairs representatives should be consulted for guidance in specific instances if necessary.
